The following titles have been registered as at 19 December 2014

1. Advice to alter dietary salt for the treatment of hypertension during pregnancy, and of pre-eclampsia and its complications
2. Analgesia for pain relief during the suppression of lactation
3. Antenatal corticosteroids for fetal lung maturation in women at risk of preterm birth for improving outcomes: an overview of Cochrane reviews
4. Antenatal maternal education for improving postnatal perineal healing rates
5. Antibiotics during pregnancy for Group B streptococcal infection
6. Calcium supplementation for treating pre-eclampsia
7. Care prior to and during subsequent pregnancies following stillbirth for improving outcomes
8. Cervical cerclage in combination with other treatments for preventing preterm birth in singleton pregnancies
9. Commercial hospital discharge packs for breastfeeding women
10. Diagnostic accuracy of biochemical tests of placental function for stillbirth and small-for-gestational-age infants in high-risk pregnancies
11. Dietary interventions for lowering cholesterol during pregnancy
12. Different insulin types and regimens for pregnant women with pre-existing diabetes
13. Different regimens of cephalosporin antibiotic given to women routinely for preventing infection after caesarean section
14. Discontinuation of intravenous oxytocin in the active phase of induced labour for improving outcomes
15. Interventions for investigating and identifying the causes of stillbirth
16. Interventions for preventing gestational diabetes mellitus for improving outcomes: an overview of Cochrane reviews
17. Interventions for preventing postpartum constipation
18. Interventions for supporting the initiation and continuation of breastfeeding among overweight and obese women
19. Interventions for supporting women with decisions about a first caesarean delivery
20. Local antiseptic application for perineal repair after childbirth
21. Maternal administration of allopurinol for women for neuroprotection of the fetus
22. Methods for measuring cervical dilatation during labour
23. Motherwort injection for preventing postpartum hemorrhage in caesarean section
24. Motherwort injection for preventing postpartum hemorrhage in vaginal delivery
25. Nutritional interventions in pregnancy: an overview of systematic reviews
26. Oxytocin bolus versus continuous infusion for reducing blood loss in the third stage of labour
27. Psychosocial, psychological and pharmacological interventions for treating antenatal anxiety
28. Rectal analgesia for pain from perineal trauma following childbirth
29. Repeat digital cervical assessment in pregnancy for prediction of time to delivery
30. Routes of administration of antibiotic prophylaxis for preventing infection after caesarean section
31. Techniques of cervical cerclage for preventing preterm labour
32. Topical treatments for vaginal candidiasis (thrush) in pregnancy
33. Transabdominal fetal ECG for pregnant women
34. Use of warm baths for relieving pain from perineal trauma sustained during childbirth
35. Vasodilators for treating intrauterine growth restriction
